

## Net Zero Commitment Statement

**Company:** JDC Building Works Ltd

**Date:** 25<sup>th</sup> November 2025

At JDC Building Works Ltd, we recognise the urgent need to address climate change and are committed to achieving **net zero carbon emissions by 2050**. This commitment reflects our responsibility to our clients, employees, communities, and the environment.

### Our Commitment

- **Carbon Reduction:** We will measure, monitor, and reduce our greenhouse gas emissions across all operations, including construction activities, supply chain, and office functions.
- **Energy Efficiency:** We will invest in energy-efficient technologies, renewable energy sources, and sustainable construction practices.
- **Sustainable Materials:** We will prioritise the use of low-carbon and responsibly sourced materials in all projects.
- **Transport & Logistics:** We will reduce emissions from transport by optimising logistics, adopting low-emission vehicles, and encouraging sustainable travel.
- **Waste Management:** We will minimise waste through reuse, recycling, and circular economy principles.
- **Collaboration:** We will work with clients, suppliers, and partners to drive innovation and share best practices in sustainability.
- **Transparency:** We will report progress annually, ensuring accountability and continuous improvement.

### Our Vision

By embedding sustainability into every stage of our operations from design and planning to delivery and completion. JDC aim to create buildings and infrastructure that not only meet today's needs but also safeguard the future.

**Signed**

Frank McGurk

Director
